JAYDEN ALONZO-ESTRADA

AI Engineering, Cybersecurity, and Linux Systems

Grand Junction, Colorado | 808-491-5116 | jayden.alonzoestrada@gmail.com | j2a3e.com | linkedin.com/in/jayae

TECHNICAL SKILLS

AI Agent Orchestration	Python, C, TypeScript, React	Linux System Administration	PostgreSQL & Web Servers
REST APIs & Backend Services	Git, GitHub CI/CD & Releases	Zero Trust, PCI & HIPAA	SSH & Firewall Hardening
Stripe, Square, Authorize.net	Test & Eval Automation	MCP Servers & Tools	Project & Customer Coordination

PROFESSIONAL EXPERIENCE

AI Engineer, EggNest.ai, Grand Junction, CO **Sep 2026 - Present**

- Own my team's customer communications and VM provisioning, and coordinate connector onboarding in Productive and HubSpot from requirements through customer testing for DealCloud, Ajera, Panzura, and QuickBooks Online.
- Standardized one-command Docker deploy bundles across every connector repo, running parallel engineer agents with a reviewer across five repos and hardening bundles for non-root client VMs and PII redaction.
- Shipped EggNest Portal features to staging, including Gremlin Tracker, a Budget Watch notifier, admin impersonation, and timecard accuracy fixes; 74 commits and 14,500+ lines in 9 working days.
- Packaged our multi-agent engineering setup (agent roles, hooks, SSH rulebook, burndown skill) as one verified plugin.

AI Services Intern, EggNest.ai, Grand Junction, CO **Oct 2025 - Sep 2026**

- Built a deep HubSpot CRM integration (11 object types, write actions, UAT agents) and a production Zoho Desk connector for Glean, created shared ConnectorLib skills, and ran audit-to-burndown agent pipelines that merged 10 PRs closing all 9 CodeQL-verified targets.

Software Developer (Independent Contractor), Rotary Club of Grand Junction, Grand Junction, CO **Nov 2024 - Present**

- Rebuilt the club's sweepstakes platform in three weeks on Next.js, TypeScript, and Neon Postgres, moving 38 charities and 5 sponsors; scrubbed leaked credentials, retired 689 password-less accounts, and tied tickets to verified Stripe, Authorize.net, and Square webhooks, gated by 96+ tests.

Field Technician, Greenflare Technologies, Denver, CO **Oct 2024 - Sep 2026**

- Repaired and maintained high-throughput Linux compute systems in production, and diagnosed Ethernet bottlenecks with packet captures and targeted load tests, boosting network throughput by ~20% in high-traffic areas.

Software Engineering Intern Summer, JGMS Government Services, Grand Junction, CO **Jun 2025 - Aug 2025**

- Shipped and operated an internal RAG service on Linux (FastAPI/Uvicorn, LangChain, Supabase PostgreSQL, React), reducing document lookup by ~3 hours/week for staff.

RESEARCH & LEADERSHIP

Student Research Head, Colorado Mesa University, Grand Junction, CO **Dec 2023 - Present**

- Lead a 6-person team building machine learning pipelines for IoMT intrusion detection and small cybersecurity language models; manage repos, sprints, code review, and experiment tracking for reproducibility.

President & Cluster Administrator, CMU Computer Science and Cybersecurity Clubs **Aug 2023 - Present**

- Built and operate a student Linux HPC cluster; run weekly packet-analysis and detection-engineering labs; coached teams to national events with average top-10 placements.

House Speaker, Associated Student Government (since May 2026); Treasurer, SHPE CMU Chapter **Aug 2025 - Present**

PUBLICATIONS

"The Effect of Increased Dimensionality on Detecting Malicious IoMT Network Traffic" by J. Alonzo-Estrada, A. Mora, A. Avila, R. Basnet. Presented at MobiSec 2025, Sapporo, Japan; published by Springer.

- Benchmarked six ML models on CICIoMT2024 across packet-level (DPKT) and flow-level (CICFlowMeter) features to quantify accuracy-versus-compute tradeoffs for real-time detection.

EDUCATION

B.S. Computer Science, Minor in Cybersecurity, Focus: AI Application, GPA 3.63 **Aug 2023 - May 2027 (expected)**

Colorado Mesa University, Grand Junction, CO. Springboard Fellow (2026); Thrive Scholar, Class of 2027; captained teams to national competitions.

Coursework: Probability & Statistics, OOP & Design Patterns, Databases, Algorithms, Python ML.
