# JAYDEN ALONZO-ESTRADA

**AI Engineer — agent pipelines, data connectors, Linux systems**

Grand Junction, Colorado | 808-491-5116 | jayden.alonzoestrada@gmail.com | j2a3e.com | linkedin.com/in/jayae

## TECHNICAL SKILLS

**Languages:** Python, C, TypeScript, React

**AI and backend:** agent orchestration, MCP servers, REST APIs, PostgreSQL, Docker, GitHub CI/CD

**Systems and security:** Linux administration, SSH and firewall hardening, PCI and HIPAA compliance

## PROFESSIONAL EXPERIENCE

**AI Engineer, EggNest.ai, Grand Junction, CO** **Sep 2026 - Present**

- Own customer delivery for DealCloud, Ajera, Panzura, and QuickBooks Online connectors, from requirements and field mapping through customer testing and VM provisioning.
- Standardized one-command Docker deploy bundles across every connector repo, running parallel engineer agents with a reviewer across five repos and hardening bundles for non-root client VMs and PII redaction; packaged our multi-agent setup as one verified plugin.
- Shipped EggNest Portal features to staging, including Gremlin Tracker, a Budget Watch notifier, admin impersonation, and timecard accuracy fixes.

**AI Services Intern, EggNest.ai, Grand Junction, CO** **Oct 2025 - Sep 2026**

- Built a deep HubSpot CRM integration (11 object types, write actions, UAT agents) and took a customer Zoho Desk connector from foundation to production.
- Ran audit-to-burndown pipelines with agent teams that verified every CodeQL finding and merged 10 PRs closing all 9 targets; shipped a connector with 225 passing tests.

**Software Developer (Independent Contractor), Rotary Club of Grand Junction, Grand Junction, CO** **Nov 2024 - Present**

- Maintained the club's existing sweepstakes platform, then rebuilt it in three weeks (July 2026) on Next.js, TypeScript, and Neon Postgres, migrating all 38 charities and 5 sponsors.
- Scrubbed leaked credentials, retired 689 password-less accounts, and tied tickets to signature-verified Stripe, Authorize.net, and Square webhooks, gated by 96+ automated tests.

**Field Technician, Greenflare Technologies, Denver, CO (remote, with on-site visits)** **Oct 2024 - Sep 2026**

- Repaired and maintained high-throughput Linux compute systems in production, and diagnosed Ethernet bottlenecks with packet captures and targeted load tests, boosting network throughput by ~20% in high-traffic areas.

**Software Engineering Intern, JGMS Government Services, Grand Junction, CO** **Jun 2025 - Aug 2025**

- Shipped and operated an internal RAG service on Linux (FastAPI/Uvicorn, LangChain, Supabase PostgreSQL, React), reducing document lookup by ~3 hours/week for staff.

## RESEARCH & LEADERSHIP

**Student Research Head, Colorado Mesa University, Grand Junction, CO** **Dec 2023 - Present**

- Lead a 6-person team building machine learning pipelines for IoMT intrusion detection and small cybersecurity language models; manage repos, sprints, code review, and experiment tracking for reproducibility.

**President & Cluster Administrator, CMU Computer Science and Cybersecurity Clubs** **Aug 2023 - Present**

- Built and operate a student Linux HPC cluster; run weekly packet-analysis and detection-engineering labs; coached teams to national events with average top-10 placements.

**House Speaker, Associated Student Government** **May 2026 - Present**

**Treasurer, SHPE CMU Chapter** **Aug 2025 - Present**

## PUBLICATIONS

**"The Effect of Increased Dimensionality on Detecting Malicious IoMT Network Traffic"** by J. Alonzo-Estrada (lead author), A. Mora, A. Avila, R. Basnet. Presented at MobiSec 2025, Sapporo, Japan; published by Springer.

- Benchmarked six ML models on CICIoMT2024 across packet- and flow-level features for real-time detection.

## EDUCATION

**B.S. Computer Science, Minor in Cybersecurity, Focus: AI Application, GPA 3.63** **Aug 2023 - May 2027 (expected)**

Colorado Mesa University, Grand Junction, CO. Springboard Fellow (2026); Thrive Scholar, Class of 2027; captained teams to national competitions, placing 4th at the ICPC regional in the first year.

Coursework: Probability & Statistics, OOP & Design Patterns, Databases, Algorithms, Python ML.
